ATLANTA, April 28, 2010 — Equifax Inc. (NYSE: EFX) today announced financial results for the quarter ended March 31, 2010. The company reported revenue of \$461.3 million in the first quarter of 2010, a 3 percent increase from the first quarter of 2009. Revenue was unchanged from the prior year when adjusted for the favorable effect of foreign exchange rates. First quarter 2010 net income from continuing operations attributable to Equifax was \$56.1 million, a 5 percent increase from the prior year. Diluted earnings per share ("EPS") from continuing operations attributable to Equifax for the first quarter of 2010 was \$0.44 compared to \$0.42 in the same period of the prior year. "The strength and diversity of our business units were again evident with our first quarter performance. North America Personal Solutions and North America Commercial Solutions exceeded our expectations for revenue growth, and four of our five business units achieved constant dollar growth over the prior year during the quarter," said Richard F. Smith, Equifax's Chairman and Chief Executive Officer. "Even more encouraging, as the economy stabilized and our clients focused more on new opportunities, our revenue trends generally strengthened as the quarter progressed."

Notes to Reconciliations of Non-GAAP Financial Measures to the Comparable GAAP Financial Measures

Restructuring Charge – During the first quarter of 2009, the Company recorded a restructuring charge primarily related to severance expense of \$\mathbb{S}\.4\$ million, pretax, (\$5.4 million, net of tax) in selling, general and administrative expenses on our Consolidated Statements of Income. Management believes excluding this charge from certain financial results provides meaningful supplemental information regarding our financial results for the three months ended March 31, 2009, as compared to 2010, since a charge of such a material amount is not comparable among the periods. This is consistent with how our management reviews and assesses Equifax's historical performance and is useful when planning, forecasting and analyzing future periods.

Diluted EPS attributable to Equifax, adjusted for acquisition-related amortization expense and restructuring charge- We calculate this financial measure by excluding acquisition-related amortization expense and the 2009 restructuring charge, both net of tax, from the determination of net income attributable to Equifax in the calculation of diluted EPS. Net income attributable to Equifax includes the results of our discontinued operation as management has had responsibility for operating profitability of this business during the period presented. These financial measures are not prepared in conformity with GAAP. Management believes that these measures are useful because management excludes acquisition-related amortization expense and other items that are not comparable when measuring operating profitability, evaluating performance trends, and setting performance objectives, and it allows investors to evaluate our performance for different periods on a more comparable basisby excluding items that relate to acquisition-related intangible assets and items that impact comparability.

Adjusted operating income and operating margin, excluding restructuring charge- Management believes excluding the 2009 restructuring charge from the calculation of operating income and margin, on a non-GAAP basis, is useful because management excludes items that are not comparable when measuring operating profitability, evaluating performance trends, and setting performance objectives, and it allows investors to evaluate our performance for different periods on a more comparable basisby excluding items that impact comparability.
