*Notes to Reconciliations of Non-GAAP Financial Measures to the Comparable GAAP Financial Measures*

**Diluted EPS from continuing operations attributable to Equifax, adjusted for acquisition-related amortization expense**- We calculate this financial measure by excluding acquisition-related amortization expense from the determination of net income attributable to Equifax in the calculation of diluted EPS. These financial measures are not prepared in conformity with GAAP. Management believes that these measures are useful because management excludes acquisition-related amortization expense and other items that are not comparable when measuring operating profitability, evaluating performance trends, and setting performance objectives, and it allows investors to evaluate our performance for different periods on a more comparable basis by excluding items that relate to acquisition-related intangible assets and items that impact comparability.
